Dear Hiring Manager,

My name is Hamin Lim, I found a job opening on LinkedIn to join as a Software Engineer for Vuno. It is a great pleasure for me to get the opportunity to be a member of a leading company in the field.

I am currently a rising senior looking to get a B.S in computer science and I do have different experiences of working in various fields. I would be the preferred candidate for VUNO because I do have solid experience in programming and a great understanding of Javascript, Python, and React throughout the courses that I took in college. Also, I will be working as a developer in Trippleasure(start-up company) to build Web applications.

I always had an interest in the interaction of computer science and the medical field. Analyzing the data of the previous patients and supporting the doctors for diagnosing can contribute to the public greatly.

Therefore, joining VUNO will be a great opportunity to become a part of the leading company in this field, and my programming skills and work experience will contribute to the company.

Sincerely,

Hamin Lim
